SO-SFP28-BX40D-2731/3127-I

SFP28, BiDi, 25G, CPRI, 1270/1310nm, SM, DDM, 18dB, 40km, I-temp

OVERVIEW

The SO-SFP28-BX40D-2731/3127-I is a bi-directional transceiver solution operating directly on a single-fiber without the need for a separate optical filter. This is achieved by having two transceivers that inject different wavelengths into the same single-fiber. The solution thus consists of two transceivers; SO-SFP28-BX40D-2731 and SO-SFP28-BX40D-3127, operating at 1270nm and 1310nm respectively. Using a single-fiber solution provides a cost-efficient solution for interconnect and it simplifies the patching since no separate transmit/receive direction has to be taken into account.

The transceiver pair supports 25GbE and CPRI option 10 services, having an optical performance that provides a bridgeable distance of up to 40km.

As stipulated by the 25G Ethernet standards, Forward Error Correction (FEC) is required to be implemented by the host equipment in order to ensure reliable system operation. The optical parameters below will provide a bit error ratio (BER) of 5 x 10⁻⁵ for 25G Ethernet. FEC will provide the required quality for secure service.

The transceiver solution is available in the Industrial temperature range (I-temp) of -40°C to +85°C (-40°F to +185°F). The transceivers provide digital diagnostic functions via a 2-wire serial interface as defined by the SFF-8472 specification.

TECHNICAL DATA

Parameter	Value
Technology	BiDi SFP28
Transmission media	SM (1x LC)
Typical reach	40km
Nominal wavelength	1270nm ¹⁾ / 1310nm ²⁾
Bit rate support	25.78Gbps
	24.33Gbps
Protocol support	25GE
	CPRI opt 10
Power budget	10 – 18dB
Dispersion penalty	Max 2.7dB
Power consumption	< 1.8W
Operating temperature	-40°C to +85°C
Storage temperature	-40°C to +85°C

¹⁾ SO-SFP28-BX40D-2731

- ²⁾ SO-SFP28-BX40D-3127
- 3) Average power
- ⁴⁾ Specified at 25GE and BER 5x10⁻⁵

Safety/regulatory compliance:

TUV/UL/FDA (contact Smartoptics for latest certification information) RoHS compliance

Parameter	Value
Transmitter data:	
Output power	Min: -1.0dBm ³⁾
	Max: +6.0dBm ³⁾
Transmit wavelength	1260 – 1280nm ¹⁾
	1300 – 1320nm ²⁾
Receiver data:	
Minimum input power	-19.0dBm ^{3) 4)}
Overload (max power)	-4.0dBm ^{3) 4)}
Wavelength range	1300 – 1320nm ¹⁾
	1260 – 1280nm ²⁾
LOS De-assert	Max -23dBm
LOS Assert	Min -35dBm
LOS Hysteresis	Min 0.5dB
DDM	Yes
MSA compliance	SFP 8402
