

QSFP-DD800 800G AEC, CMIS 5.2

QDD800 – QDD800 Active Electrical Cable (AEC) 800GbE, AWG32, CMIS5.2, 1.0-3m

DD8001-xxxC-SO

DD8001-xxxC-SO is an Active Electrical Cable (AEC) solution of Twinax type, i.e. a copper cable similar to coaxial cable, but with two inner conductors instead of one. DD8001-xxxC-SO is a solution for 800Gbps connections within racks and across adjacent racks where the interconnected equipment uses QSFP-DD800 interfaces. It provides a cost-efficient solution as compared to using optical transceivers and it simplifies the patching since no separate transmit/receive direction has to be taken into account.

DD8001-xxxC-SO incorporates a data-signal processor (DSP) in each end to enhance the performance of the electrical characteristics. The electrical interface of the module are compliant with 800GAUI-8, 400GAUI-4, 200GAUI-2, 100GAUI-2, 100GAUI-1 and 50GAUI-1 as well as the QSFP-DD800 MSA.

DD8001-xxxC-SO integrates eight data lanes (50Gbd) in each direction using PAM4 modulation with 800Gbps aggregate bandwidth.

DD8001-xxxC-SO cables have an I2C interface with Integrated Digital Diagnostic Monitoring according to the Common Management Interface Specification CMIS 5.2.

The DD8001-xxxC-SO is provided in lengths from 1 to 3 meters (3.3 to 9.8 ft).
